✂ Ask a grownup to help you cut just inside dashed line.

A HUGE thank-you!

BUNTING FLAGS

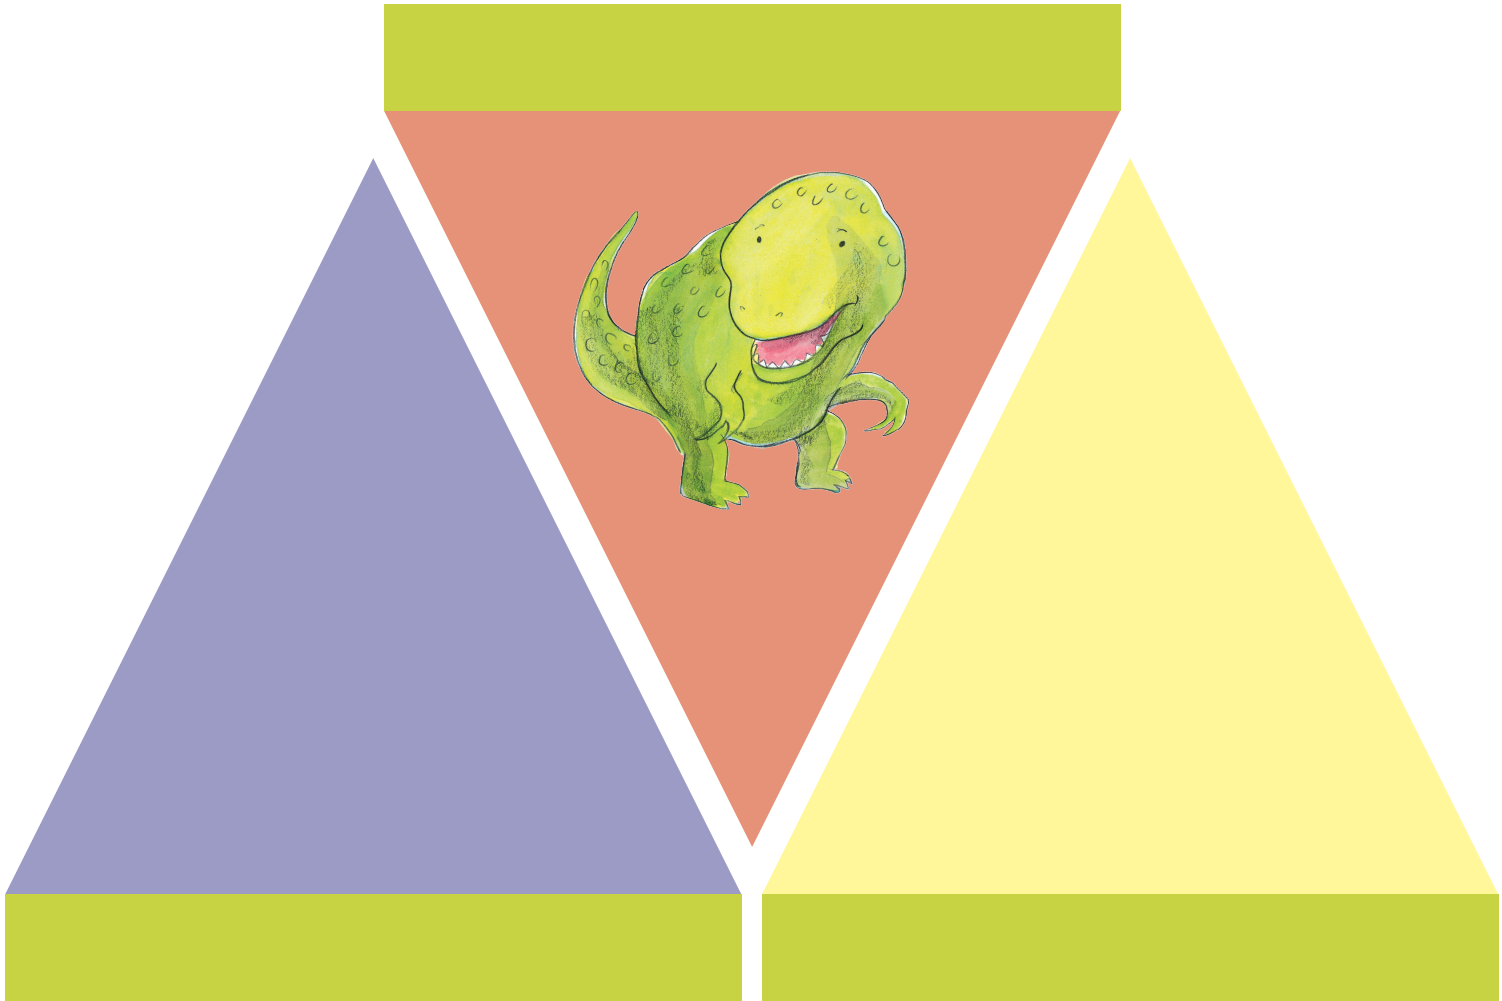

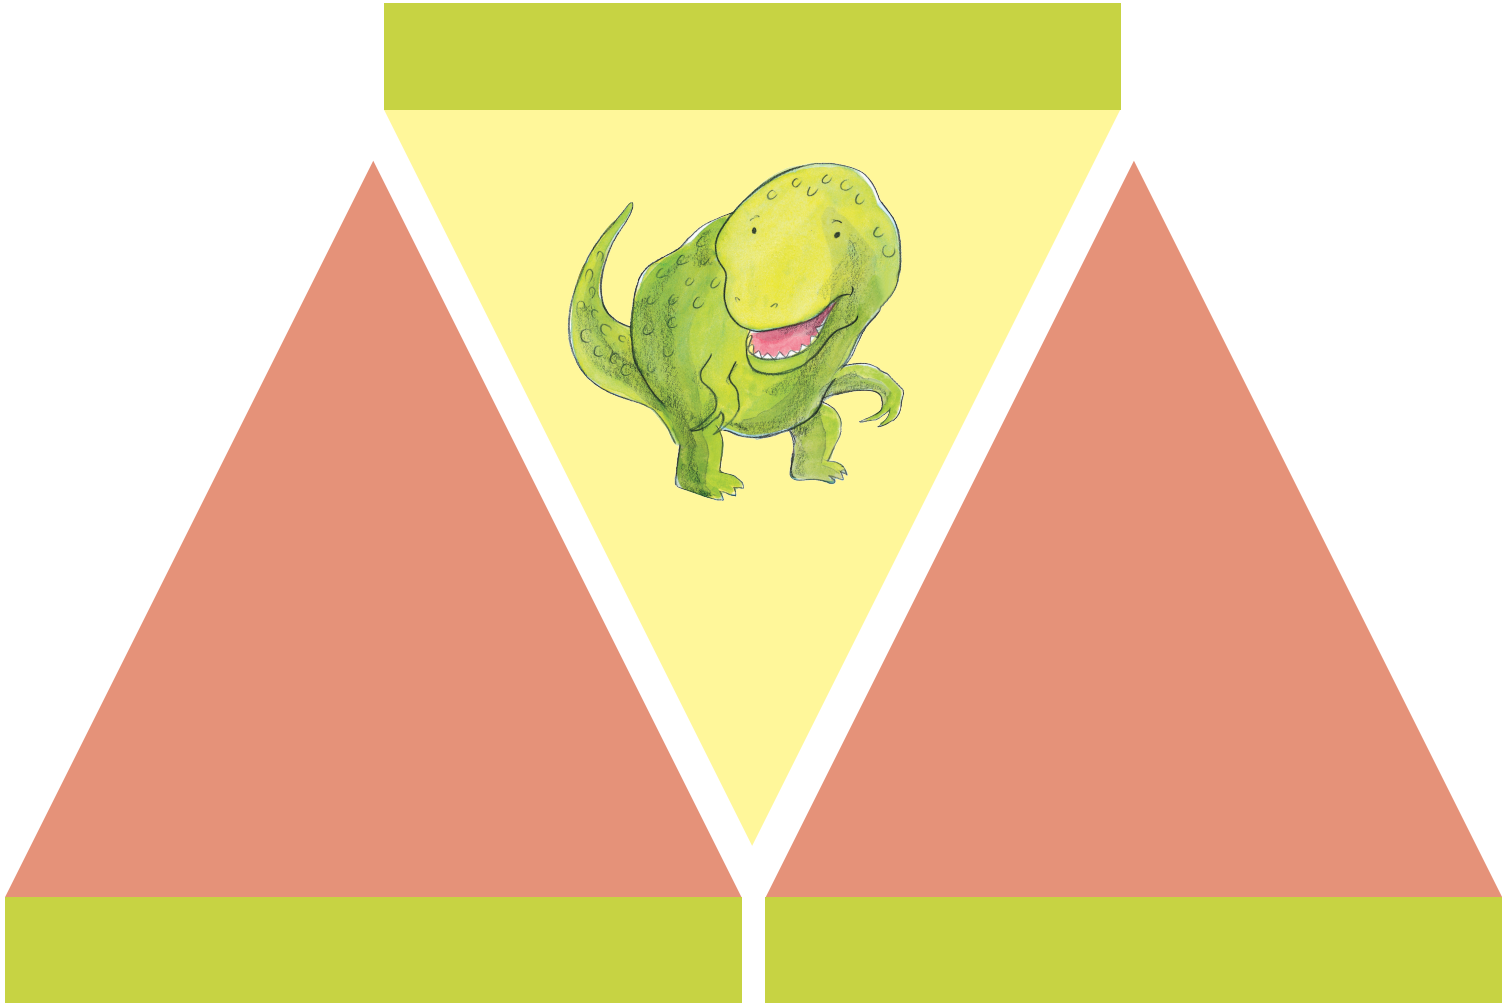

INSTRUCTIONS:

- ◆ Ask a grownup to help you cut a piece of string about 8 feet long. ✂
- ◆ Ask a grownup to help you cut out the flags. ✂
- ◆ Lay flags out in order shown below, light green edge up.
- ◆ Slip string under the light green edge of the flags and fold the edge back over the string.
- ◆ On the back side of each flag, use tape to secure the folded edges over the string.
- ◆ Hang up your banner and you're ready to party!

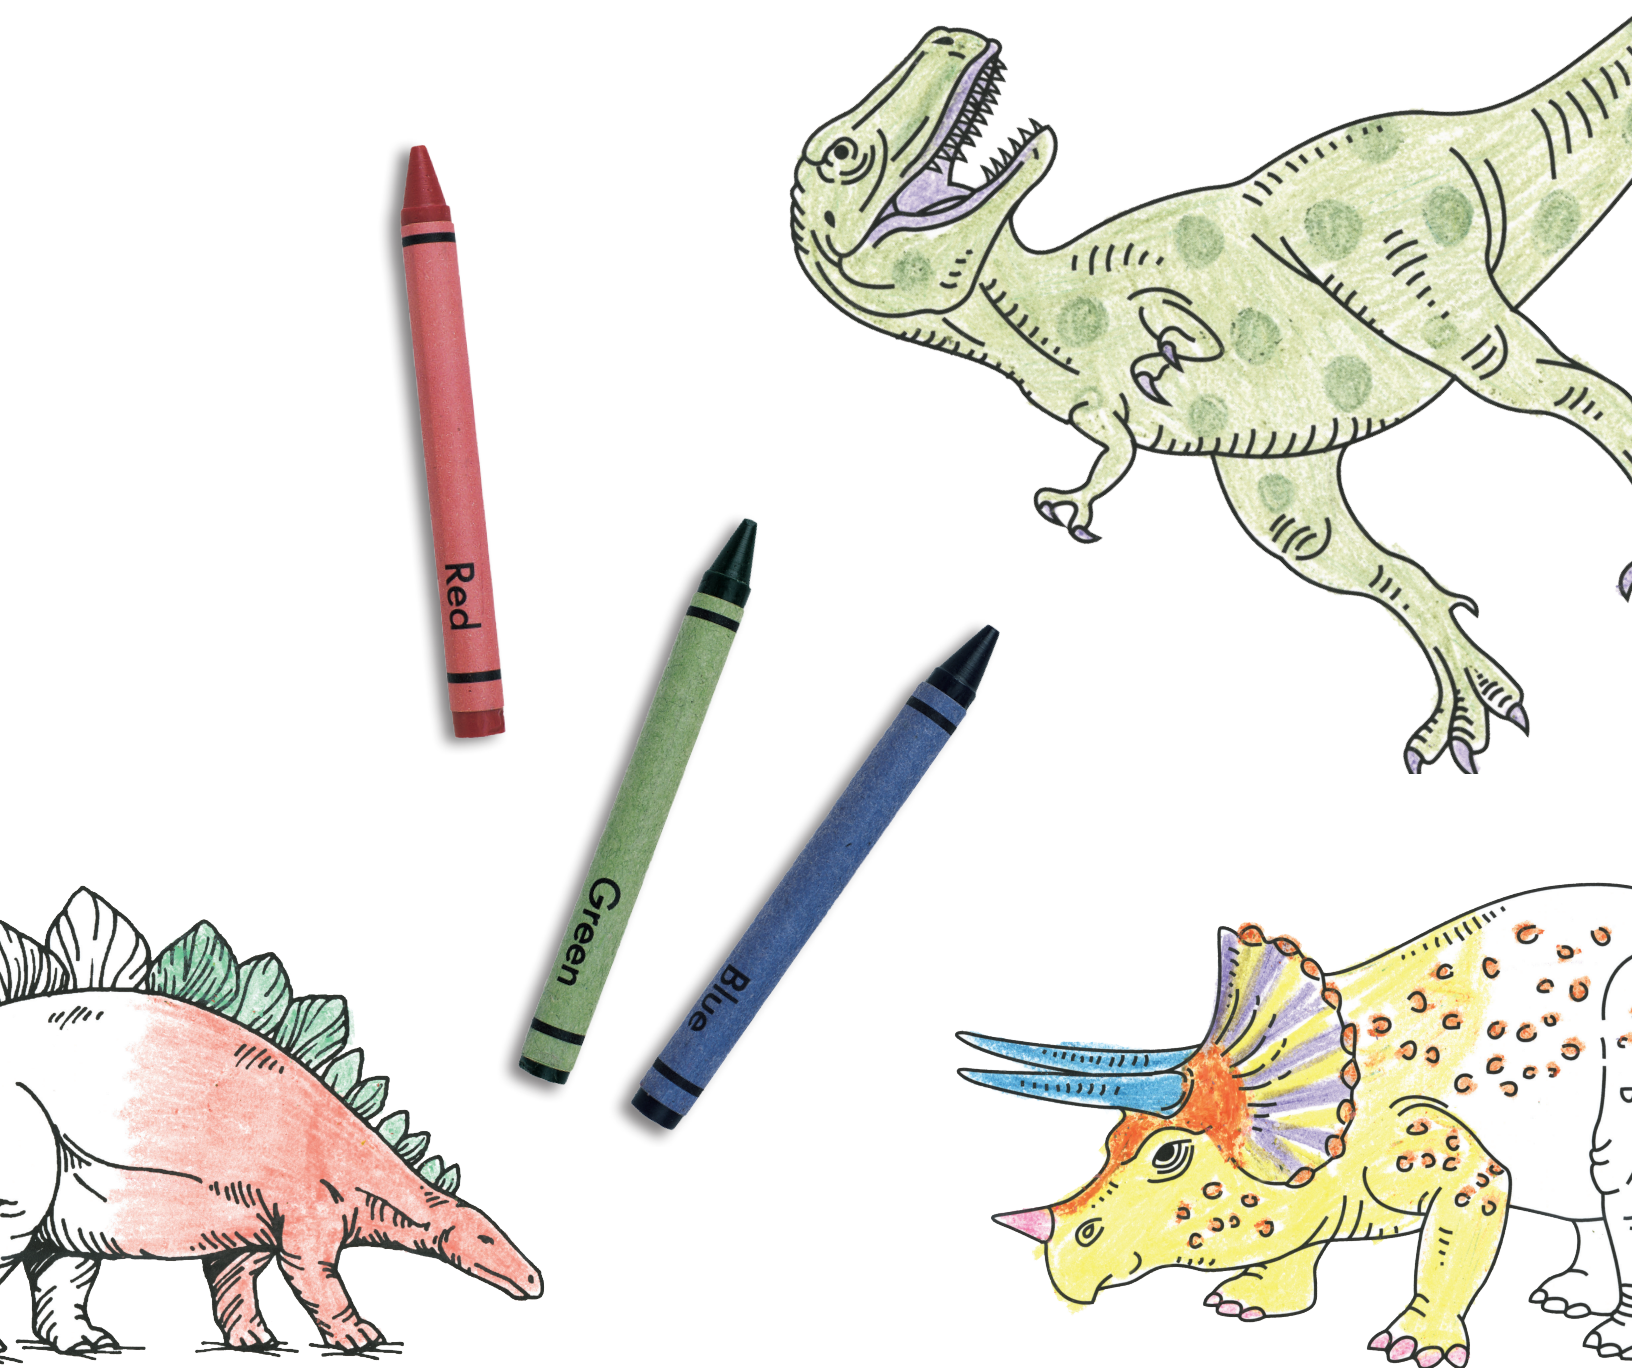

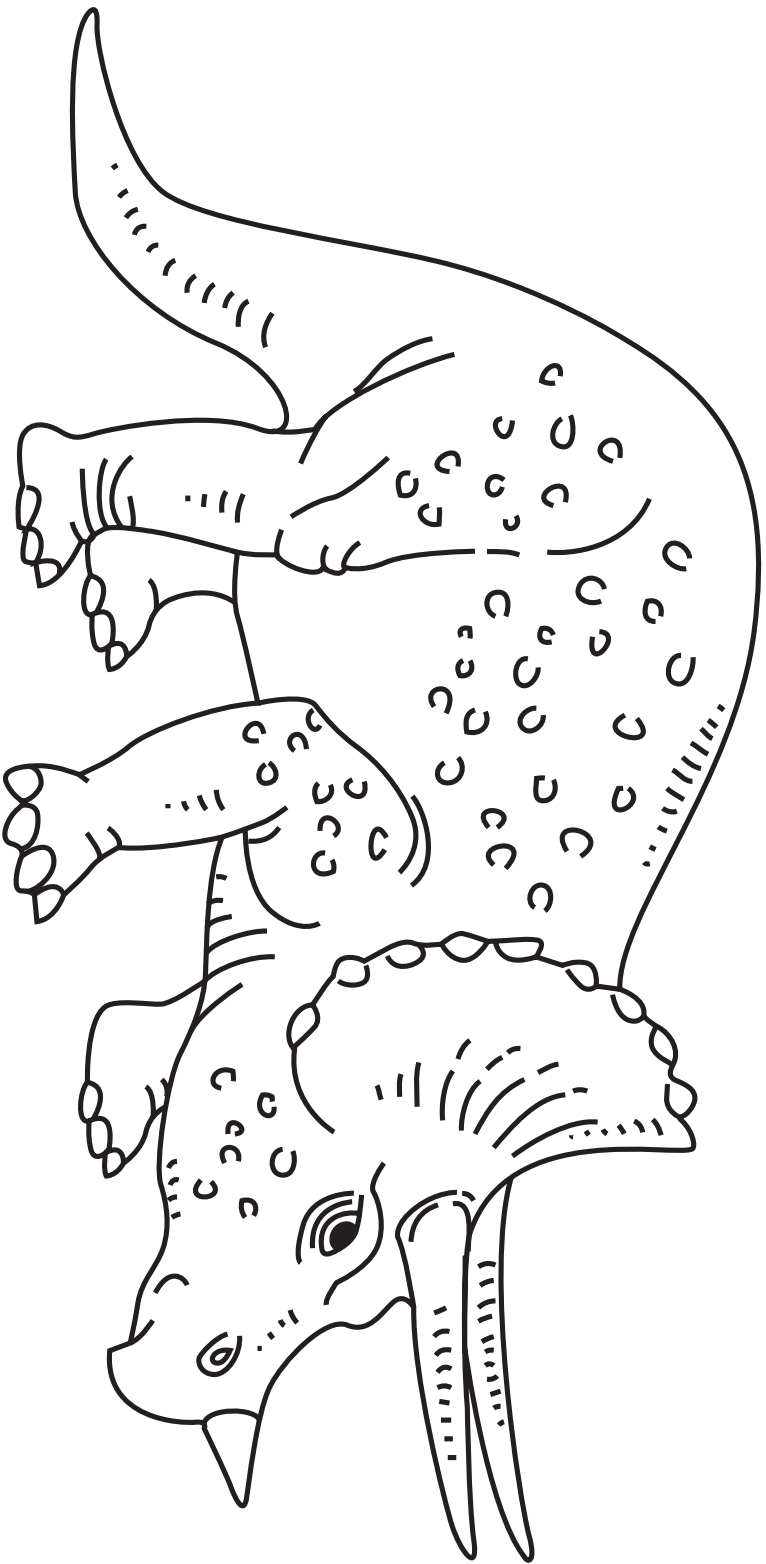

COLORING PAGES

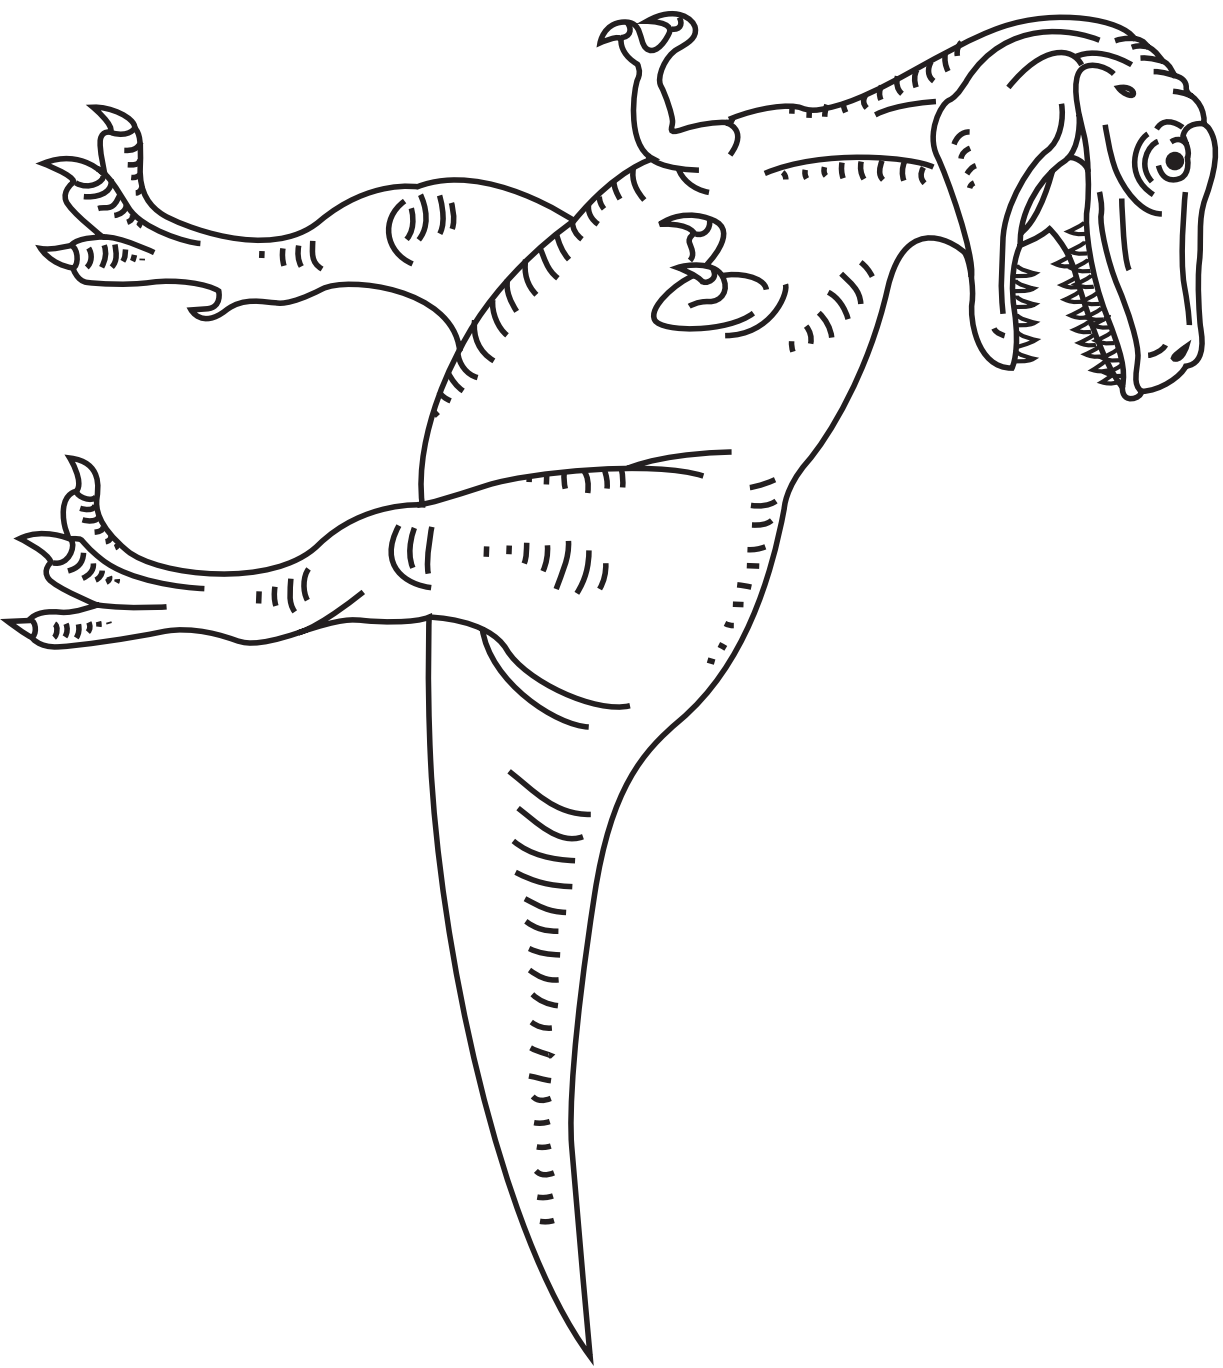

INSTRUCTIONS:

- ◆ Use your favorite crayons, colored pencils, markers, or paints to color in the dinosaurs. 
- ◆ Draw a background or add friends (or predators!) to your dinosaur scene. 
- ◆ Use your imagination!

TRICERATOPS had between 400 and 800 teeth. Imagine how long it would take to floss those!

TYRANNOSAURUS REX'S head grew to five feet long. Its skull had holes in

it so the head wouldn't be too heavy to carry around!

STEGOSAURUS was as big as a bus, but its brain was only the size of a walnut!

Different dinosaurs had different teeth depending on their diet. Carnivores had sharp teeth. Herbivores had flat teeth that were good for ripping plants from the ground.

Paleontologists believe baby dinosaurs were able to stand, feed, and run from predators as soon as they hatched. Smart kids!

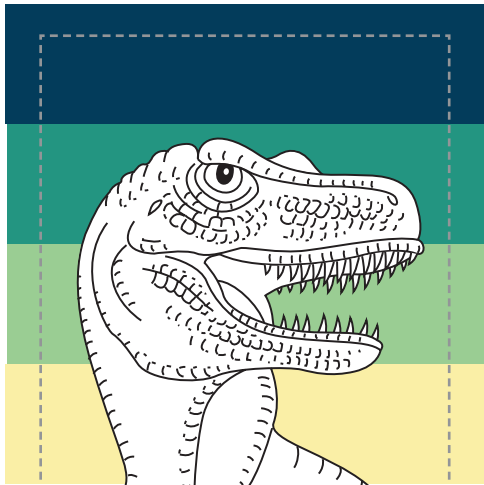

Paleontologists believe there were bird-like dinosaurs that lived in trees. They weren't afraid of heights like this guy!
